

# HERITAGE WALK

**St James**  
Designed for life

## UPDATE AND WHAT'S NEXT?

With both tower cranes now up on site our groundworks contractor is making steady progress across the site. The ground floor slab of Block A has now been poured and they are currently preparing the columns in block A and the ground floor slab in Block B.

On Saturday 13<sup>th</sup> February, our gas contractor will be bringing the gas main across Kew Bridge Road into site. These works will require a stop and go traffic light system to be in place across Kew Bridge Road. It is estimated these works will take approximately a week to complete.

## Looking back on 2015

It was another successful year for Kew Bridge West with a Considerate Contractors National Site Bronze Award and three NHBC awards: Pride in the Job, Quality Award and Seal of Excellence.

### **Heritage Walk Complaints Procedure**

To notify St James of any issues please contact:

John Browning (Project Manager) or John Morris (Site Manager)
